

Fast Facts

CSG Mission

- To promote energy efficiency and the development of renewable resources
- To protect the environment
- To make homes safer and healthier, with lower operating costs
- To create a sustainable, profitable industry

Markets Served

We design and deliver energy efficiency and renewable energy programs for:

- Public utilities
- State and federal agencies
- Communities and municipalities
- Public housing authorities, affordable housing groups
- Clean energy generators

Our programs serve homeowners, apartment owners, home performance contractors, and green builders.

Products and Services

Program Management

CSG provides award-winning expertise in creating and operating mid-to large-scale efficiency programs. We manage a full range of residential energy efficiency and renewable energy programs: Home Performance with ENERGY STAR®, single- and multi-family retrofits and new construction certifications, HVAC improvement, and multi-program combinations.

Services Include:

- Program start-up, implementation & reporting
- Quality Assurance / Quality Control
- Incentive processing
- Contractor recruiting & management
- Strategic marketing
- Customer contact centers
- Comprehensive technical assessments and building science services

In-Home Service

CSG offers comprehensive technical assessments, QA inspections, appliance procurement and recycling, direct measure installation, contractor oversight, and customer engagement.

Training Services

Building science-based education includes online CEUs; BPI and RESNET trainings.

Clean Energy Services

We provide clean power generation tracking, sales and trading of renewable energy credits.

Policy and Research

We support our clients and contractor allies in regulatory review of programs, and in formulating relevant state policy.
